PRODUCT TEAR SHEET

See their face. Meet their eyes.

iVi is the all-in-one video communication device that delivers true optical eye contact, making every virtual conversation as natural and engaging as meeting in person.

Why iVi?

Eye contact strengthens relationships, deepens interest, and establishes credibility. But every video call forces a choice: look at the screen to see the person, or look at the camera to meet their eyes. Standard webcams sit above or below your screen, so your gaze always lands off-centre, and the connection suffers.

What is iVi?

iVi places a 4K camera directly behind its display using patented beam-splitter optics: no software tricks, no gaze correction. In one sleek, compact device you get true eye-to-eye contact, Harman Kardon audio, studio-quality microphones, and integrated LED lighting. One USB-C cable connects it all.

Benefits

1

The power of true eye contact

Optical, not AI, eye contact makes conversations more engaging and personal. What they see is genuinely you.

2

Works with your favourite platforms

Integrates effortlessly with Zoom, Teams, Meet, Webex, and more. Connects easily to computers and networked devices.

3

Advanced tech, easy setup

Camera, display, microphones, speakers, and lighting in one device, up and running with a single cable.

"I now see clients with iVi and they give very positive feedback. Their perspective is that the assessor feels more present and attentive."

Dr Chris Watson · Consultant Psychiatrist

When your meetings matter.

Content Creators

Your audience connects with you through the lens. Read chat, notes, or a teleprompter while looking directly at your viewers.

Executives

Presence commands trust. Your team and stakeholders feel your full attention on every call.

Clinicians

Patients perceive you as more present and attentive, presence that supports real therapeutic connection.

Tech specs

CAMERA

Sony IMX678 4K Sensor

1/1.8-inch sensor, 2.0 μ pixel size.
3840 × 2160 resolution at 30 fps.

DISPLAY

10.1" IPS Anti-Glare LCD

1920 × 1200 resolution. 80° viewing angle. Camera positioned directly behind the screen.

MICROPHONES

4× Harman μ Noise MEMS

Omnidirectional, ultra low noise, designed for voice. Range 100 Hz – 10 kHz. SNR 64 dB.

SPEAKERS

Harman Kardon Stereo

Custom drivers powered by XMOS
32-bit VocalFusion DSP. 7 W max.
130 Hz – 20 kHz.

LIGHTING

Dual LED Strips

Adjustable colour temperature, cool to warm. Top light eliminates shadows; bottom LED doubles as a desk lamp.

AV HUB

Multi-Input DSP

1× 3.5 mm jack · 1× XLR with +48 V phantom power · Digital EQ · 1× HDMI in · 1× HDMI out · 1× USB-C 3.1 · 1× USB-C powered DC out (5 V 2 A) · 1× USB-A.

Weight & dimensions: 18 lbs · 12.5 × 10 × 22.5 in | **Shipping:** 23 lbs · 24 × 14 × 13 in | FCC & CE certified · 2 granted patents (AU/US)

"The natural eye contact, clear audio, and simplicity of the device make every conversation more engaging and effective. It's transformed the way I communicate online."

John C. Ittleson · Professor Emeritus, California State University
